

Golf Scorecard Template

A blank 18-hole card to print, fill in, and build your design from

From Pars and Paper, the golf scorecard brand of MCI
Printing, a St. Louis print shop founded in 1984.

This is a blank regulation card. Print it, write your course into it, and photocopy it as many times as you like. It is yours to use, with no form to fill in first.

COURSE				DATE						TEE TIME						RATING / SLOPE					
Hole	1	2	3	4	5	6	7	8	9	OUT	10	11	12	13	14	15	16	17	18	IN	TOTAL

Player																					
Player																					

Write your tee names into the left column. Leave a row blank if your course plays three tees.

How to use this template

1. **Print it.** US Letter, landscape, at 100 percent scale. Turn off your printer's fit-to-page setting or the grid comes out undersized.
2. **Fill in the fixed data once.** Course name, the four tee names and their yardages, par, and the stroke index. That is the half that does not change between rounds.
3. **Copy it for play.** Photocopy the filled-in sheet for casual rounds, outings, and league nights. The player rows and the header blanks are what each round rewrites.
4. **Bring it to a printer when you outgrow it.** A filled-in sheet is a complete spec. Hand it to us as a photo or a scan and it becomes the proof for a real card on real stock.

When you are ready for a real card

A photocopy is fine for a scramble. A card that lives in a pro shop rack for a season wants stock that survives a wet morning. These are the specs a print shop will ask you for.

Common flat size	4" × 11"
Folds to	4" × 5.5"
Bleed	0.125" on every edge, with nothing important inside 0.25" of the trim
Artwork resolution	300 dpi at final size, vector logos preferred
Color	CMYK for print. A screen RGB file will shift on press
Minimum order	250 cards

Turn this sheet into a printed card

Send us the filled-in template, a photo of your current card, or a rough sketch. You get a digital proof within 24 hours, and production ships within 3 business days of proof approval (shipping additional).
